

EXTRACTIVE INDUSTRY GEOLOGY CONFERENCE 96

Advances in Aggregate Testing

Monday 15th April 1996 PM

Testing Aggregates for Potential Alkali-Aggregate Reactivity - D Hooton, University of Toronto

A Statistical Study of Aggregate Testing Data with Respect to Engineering Judgement - R J Howarth, University College London; W J French, Queen Mary & Westfield College

Petrographic Evaluation of the Skid Resistance and Other Parameters of Road Surface Aggregate - W J French, S Kermani, C F Mole, Queen Mary & Westfield College

Possible Problems with High PSV Aggregate of the Gritstone Trade Group - A R Woodside, W D H Woodward and M J Perry - University of Ulster

Assessing the Wear Characteristics of Aggregate Exposed at Road Surfaces - A R Woodside, W D H Woodward - University of Ulster

An Approach to the Abrasion Testing of Individual Pieces of Construction Materials - M A Eden, Geomaterials Research Services Ltd
